Ensuring The Voice of The Pre Verbal Child Is Heard - Recording, Reporting, Care Planning - Half Day Workshop

Event description	Messages from case audit have identified that workers in direct contact with pre-verbal children are not confident in making and recording observations of the child's behaviour. In simple terms this means watching children and seeing if it matches what parents say about them, recording behaviours/interaction factually, not being 'groomed' by parents or showing 'confirmation bias', understanding behaviours that may relate to SEN but also being aware of when behaviours may indicate self harm/distress. This half day workshop will assist all frontline workers in their observations of and communication with pre-verbal children so that the 'voice' of such children is reflected in records, reports and care planning.												
Learning Outcomes	By the end of the training participants will be able to: <ul style="list-style-type: none"> - Outline normal speech and language development - Consider the ways in which communication with pre-verbal children, record keeping and subsequent care planning can be enhanced - Outline strategies for working with pre-school deaf and disabled children and those on the autistic spectrum - Discuss the application of particular communication tools/strategies to safeguarding and child protection work including assessment of parenting and quality of child/parent attachments
